### Program at-a-glance

- 8:15 a.m. Registration and Networking Breakfast
- 9:00 a.m. Engineered Wood, Sustainability and Green Building Practices - I HSW - NORDIC ENGINEERED WOOD  
After this presentation you will be equipped to define and discuss sustainable issues, compare construction materials for "green" compatibility, identify and select various Green Rating Tools, compare/contrast Green Building Programs, discuss EWP framing systems recognized as "green" by current Green Building programs and evaluate various EWP products based on the deconstruction/reconstruction principal.
- 10:00 a.m. Woodwork Standards Veneer Solutions - I LU - SUMMUM WOODWORK CORPORATION  
This program increases the participants understanding of plywood, construction balance, types of panel cores, species selection, and complete specifications for a successful job.
- 11:00 a.m. Break
- 11:15 a.m. Recognizing 'Green' in Windows - I HSW - GOLDEN WINDOWS  
After this presentation you will be able to better understand 'Green' and the issues surrounding it, understand 'Green' features in different types of windows, 'Green' window codes and how windows fit within the different 'Green' programs
- 12:15 pm. Lunch
- 12:45 p.m. **Guest Speaker - TBC**
- 1:30 p.m. Sustainability and Energy: How To Create Far Better Buildings - I HSW-SD - ICYNENE INC.  
This presentation takes a fundamental look at the concept of sustainability in building design – what it means and how to achieve it. Its thesis is that a greater understanding of simple facts about energy can help us build healthier buildings that are more energy conservative and that will last longer.
